PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate (CGPA: 8.15/10) with strong expertise in backend engineering, full-stack web development, and scalable software design. Proficient in Java, Python, JavaScript, SQL, Spring Boot, Node.js, MongoDB, and RESTful API development. Experienced in developing end-to-end applications, including URL shortening services, Resume analyzer, and weather application system. Passionate about solving complex problems through clean, efficient code and eager to contribute as a Software Engineering, Backend Development, or Full-Stack Development Intern.

EDUCATION

Ajay Kumar Garg Engineering College

Ghaziabad, Uttar Pradesh

Bachelor of Technology – Computer Science and Engineering

CGPA: 8.15/10 2023 – 2027

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, OOP, SDLC

EXPERIENCE

Frontend Developer Intern

Aug 2025

CodeAlpha

- Developed responsive web interfaces using HTML, CSS, JavaScript, and ReactJS.
- Integrated REST APIs and improved UI responsiveness across multiple devices.
- Performed debugging, testing, and component-level validation to enhance user experience.
- Collaborated in an Agile development environment while maintaining clean and reusable code.

PROJECTS

URL Shortener Platform

2026

Tech Stack: Spring Boot, Java, MongoDB, Maven, REST APIs, HTML, CSS, JavaScript

Frontend | Backend | Github

- Developed a scalable URL shortening service supporting custom aliases, URL validation, QR code generation, and click analytics.
- Implemented REST APIs for URL creation, redirection, and usage tracking using Spring Boot.
- Designed a responsive frontend enabling users to generate, copy, and monitor shortened URLs.
- Applied service-layer abstraction and exception handling to improve maintainability.

Resume Analyzer

2026

Tech Stack: Python, Flask, OpenAI API, NLP, PostgreSQL, Plotly

Github

- Developing an ATS-inspired resume evaluation platform that integrates OpenAI APIs.
- Implementing resume parsing, keyword extraction, and job-resume matching.
- Building interactive dashboards for candidate insights and scoring.
- Designing Flask APIs for real-time resume analysis and feedback generation.

Weather Application

2025

Tech Stack: JavaScript, HTML5, CSS3, OpenWeatherMap API

Demo | Github

- Developed a weather forecasting application consuming OpenWeatherMap APIs.
- Implemented asynchronous API calls, dynamic UI rendering and error handling.
- Displayed temperature, humidity, wind speed and location-based forecasts.
- Deployed the application on Vercel for global accessibility.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C++, HTML5, CSS3

Frontend: ReactJS, Bootstrap, EJS, Responsive Design

Backend: Spring Boot, Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Maven, Postman, VS Code, Cloundinary

Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, MVC, SDLC

CERTIFICATIONS

- Full Stack Web Development – Udemy
- Python Programming – Udemy
- Problem Solving Certificate – HackerRank
